

# WORK WITH US AND HELP POWER THE WORLD WITH AUSTRALIAN LIQUEFIED NATURAL GAS (LNG)

## Looking for a career in the energy sector?

The Santos GLNG Apprenticeship and Traineeship Program, delivered by PROGRAMMED, leads to real employment opportunities and nationally recognised trade and certificate level qualifications.

Every year we search for highly motivated people to join the Santos GLNG Team. Applications for apprenticeship and traineeship opportunities, based at our Curtis Island LNG Facility, open between July and August each year, for a start date in February the following year.

### Kick start your career with:

- An Electrical Instrumentation Apprenticeship
- A Mechanical Fitter + Turner Apprenticeship
- A First Nations Pathways Program Traineeship
- A Process Plant Operator Traineeship

For more information head to [info.programmed.com.au/santos](http://info.programmed.com.au/santos)

## Vacation and graduate programs

Santos offers 12 weeks' vacation employment to students who are currently in their penultimate year of undergraduate study.

Offered November through February each year, the program provides students with hands-on experience through challenging project work.

It gives students the chance to determine their interest in the industry, and Santos an opportunity to assess student potential for the following year's graduate positions.

Santos's Graduate Program includes an induction program, performance goals, individual development plans, job rotation, mentorship and support and competitive remuneration and benefits packages.

### There are opportunities for students in the following disciplines:

- Petroleum Engineering
- Mechanical/ Mechatronic/ Aerospace Engineering
- Chemical Engineering
- Electrical Engineering
- Civil Engineering
- Geoscience/ Geophysics and Petroleum Geoscience
- Environmental Management/ Science
- Conservation Management

Learn more about our vacation and graduate programs via the early career pathways page on the Santos [santos.com](http://santos.com) website.

Register your interest directly via the Santos Careers Portal at [recruitment.santos.com/graduateCareers](http://recruitment.santos.com/graduateCareers) or contact the Santos Team directly on [graduate.recruitment@santos.com](mailto:graduate.recruitment@santos.com).

GLNG is a Santos PETRONAS TotalEnergies KOGAS venture.

# WE'D LIKE TO WORK WITH YOU AND BUY LOCAL

# Santos GLNG

Santos GLNG works to build a better future by leaving a positive legacy and having a positive impact in our communities. One of the ways through which we do this is our procurement process.

In 2022 we spent over \$34 million in the Gladstone Region on local goods, services, rates and taxes with 78 suppliers.

Operation of our GLNG Facility depends on local knowledge and expertise, and we are committed to awarding work to local suppliers who share our values, which includes businesses like Corfield's Electrical, Coast 2 Country Construction, Purcell's Engineering and Xtreme Engineering.

We want to work with suppliers who are economically, environmentally, and socially responsible, and contribute to the sustainability and ongoing development of our community.

Santos' Supply Chain Team manages all procurement and logistics activities for Santos GLNG. Their team is responsible for strategic sourcing, purchasing, materials management, logistics, inventory management and accounts payable.

 **Over  
\$34m**

spent every year on local goods, services, rates and taxes.

**78 local suppliers** 

worked with Santos GLNG in 2022.

## Get in touch

Contractors and suppliers who wish to work with Santos GLNG can submit their details to Santos' Prospective Suppliers Database at [santos.com/procurement](https://santos.com/procurement).

## Staying local

Santos GLNG has been a member and supporter of Gladstone Engineering Alliance (GEA) since 2010.

Every year we connect with local suppliers at GEA's Supply Chain Expo, and in 2023 we took part in the expo's highly anticipated Meet the Buyer Sessions.

We look forward to continuing our support of the annual expo, and continuing to strengthen our relationships with local businesses, through engagement with industry bodies such as GEA, and other special interest groups.
